SALICE

Bortoluzzi Sistemi

THE COMPANY

Packing of products to be shipped at Salice's workshop at the end of the fifties

Salice, a leader in the field of concealed hinges and accessories for furniture, produces a wide range of high quality products meant for industries specialized in the field of kitchen cabinets and furniture in general. With over 400 employees and eight subsidiaries, Salice exports 65% of production to over 80 countries worldwide.

Its history began in 1926 when Arturo Salice started in Cantù, Como province, a trade activity for the retail distribution of furniture hardware produced in Italy or imported from foreign countries. The activity, initially confined to the local area, eventually extended to the whole of Italy.

At the end of the fifties, the first factory was built in Cantù, Italy and Arturo Salice started the production of his own line of furniture hardware.

His sons Giorgio and Luciano eventually entered the company, supporting their father in the management and in upholding the typical values of the Lombard industrial tradition.

On February 22, 1957, Salice registered the first international patent for a concealed, cylindrical and self-closing hinge for furniture, marking a technological milestone for the whole industry. Thus, Arturo Salice S.p.A. was born.

The factory at Cantù proved insufficient to accomodate the rapid growth of the company, which was favoured by the increasing success of the Salice hinges among the furniture industries in Italy and abroad, thus, expansion was needed.

Old Salice workshop in Cantù, Italy

The construction of new and bigger production facilities to meet the development of the company and a progressively growing demand could not be postponed.

In 1975, the huge new factory at Novedrate, the present home of the company, was inaugurated.

In the year 2000, the company acquired ADAR S.p.A., now known as SALICE GUIDE S.p.A., which specializes in the production of runners and metal drawers.

In the year 2010, the company acquired 40% of BORTOLUZZI SISTEMI S.p.A., which specializes in the production of sliding door systems, completing the group's wide range of products.

Only Made in Italy Since 1926

YOUR HOME, OUR MISSION
Currently located in Novedrate, Italy with a total land area of almost 300,000 sqm, Salice is one of today's top manufacturer of furniture hardware. Salice holds a well-established position worldwide by virtue of its natural talent for innovation, careful attention to quality, efficiency of customer service, and reliability earned during more than 80 years of experience.

Air
Lightness and functionality

Pacta
flap down system

Titanium

WARMTH AND TECHNOLOGY
The new titanium finish perfectly conveys a sensation of warmth and at the same time, incorporating modern functionality. The corrosion strength is considerably increased compared to the classic nickel-plated finish.

Only Made in Italy Since 1926

CONCEALED HINGES

UNSURPASSED QUALITY
Salice hinges have been quality-tested by Germany's LGA for your added peace of mind. A special test was requested to show that Salice hinges can reach up to 200,000 cycles, well above the industry standard.

SILENTIA+ ADJUSTABLE INTEGRATED SOFT-CLOSING HINGES

Silentia+ allows a perfect and constant closing of the door in any condition, use and application. The innovative soft-close technology guarantees an excellent performance to the complete range of hinges. Silentia+ includes numerous technological elements in the required spaces and maintains the aesthetics of the hinges of the first generation.

PUSH REVERSE SPRING PUSH-TO-OPEN HINGES

Getting tired of handles? Salice's Push hinges are perfect for you. Equipped with a patented reverse-spring technology, we guarantee a 45-degree opening every time the magnetic catch is released. Salice's hardware technology continues to lead the industry in design and innovation.

BASIC SELF-CLOSING HINGES

Versatile yet powerful! All our hinges are guaranteed for life! Reaching up to 200,000 cycles with rigorous testing conducted by LGA. Salice surely lives up to its reputation of being a brand of strength, durability and reliability.

Only Made in Italy Since 1926

DRAWER SYSTEMS

LINEABOX ALUMINUM DRAWER BOXES

Lineabox features a 9mm minimal wall thickness to maximize internal space. Streamlined aesthetics uncluttered with holes or assembly components give a luxurious and minimalist feel. Lineabox drawers are suitable for kitchens and entertainment areas.

FUTURA UNDERMOUNT DRAWER GUIDES

Salice's Futura Smove soft-closing and Futura Push runners are equipped with patented air-smooth technology which allows perfect gliding motions while eliminating noise. Sliding movement is fluid, silent and progressive.

SPLIT DRAWER DIVIDERS

Split is the system of dividers and storage compartments that allows the freest and most personalised organisation of drawer interiors. Split has elegant and streamlined aesthetics. Its 3 mm wall thickness makes Split the slimmest divider system ever.

Only Made in Italy Since 1926

slider

Coplanar sliding systems

SLIDER
Coplanar sliding door system, Slider allows the doors to sit fully flushed when closed. The mechanism can hold up to 50kg per door for large kitchen or wardrobe doors and 20kg for sideboard and cupboard applications while still providing smooth and silent movement. The mechanism can be adapted to structures up to 200mm wider than the mechanism itself.

Bortoluzzi Sistemi

ECLIPSE
Pocket door system with patented smooth lateral assisted positive opening and cushioned soft-close movements which are controlled by a safety device. Bortoluzzi Sistemi's technology guarantees smooth and perfectly balanced movements with no discontinuity. Eclipse is easy to install, adjust and remove without dismantling the entire cabinet.

eclipse

Pocket door systems

GLOW+
Overlapping sliding door mechanism equipped with a revolutionary magnetic buffer and hydraulic decelerator. Glow+ finally eliminates the noise produced when the buffer is engaged. This innovative solution marks the dawn of a new era in sliding mechanisms, with a movement that is smoother and more silent than any have gone before.

glow+

Overlapping sliding systems

mover

Vertical sliding systems

MOVER
Mover is a vertical sliding system for wall cabinet doors. The compactness of the mechanism, which moves on vertical runners, fits perfectly with applications, especially in restricted spaces, where the conventionally opening doors would be unworkable. The movement on silent runners is smooth and perfectly controlled in any situation.
